

This background image is a typical application for Rosco's ImagePro Gobo Slide Projector. The image is available from the Rosco CD library of images. It can be ordered over the phone and delivered within 24 hours. The image is assembled in an iPro mounting, ready for immediate use.

ImagePro™ Gobo Slide Projector: Theatrical Projections at Budget Prices

Rosco's ImagePro Gobo Slide Projector offers users an easy, inexpensive solution for projecting photographic quality images in a theatrical setting.

The ImagePro device fits into the iris slot of an ETC Source Four, Altman Shakespeare, Strand SL or Selecon Pacific. It uses the optics of these spotlights to furnish crisp, bright images onto a stage, a trade show exhibit, a television or film studio or other settings.

The ImagePro device includes a fan box to drive cooling air across the front and back of the plastic slide to reduce the temperature in the iris slot. By utilizing special infrared reflecting filters, the ImagePro slows heat degradation of the slide.

The ImagePro projector requires an electrical circuit to power its 12v fan. You may use a dedicated circuit, either non-dim or dimmable. Rosco also offers a hybrid two-fer adapter (product no. 265 25500 0000) with one female parallel blade plug (sometimes called Edison plug) and one female stage pin connector. This allows you to connect the ImagePro projector into the same circuit powering the luminaire.

No. 265 25100 0120
ImagePro Gobo Slide Projector

Rosco's ImagePro Projector fits the iris slot of most modern spotlights, such as the ETC Source Four, Altman, Shakespeare, Strand SL and Selecon Pacific. An iPro Slide fits snugly into the device.

HOW TO GET THE IMAGES YOU WANT FOR THE IMAGEPRO GOBO SLIDE PROJECTOR

1. CHOOSE FROM THE LIBRARY

No. 1600

No. 3859

No. 4863

No. 7850

Rosco has hundreds of images available for immediate use in the ImagePro Gobo Slide Projector. These images, like those shown above, have been specifically selected for their value in theatre, opera, ballet, television and concerts. A CD containing the images is shipped with each ImagePro Projectors. Constantly updated, the most current collection is available on the Internet at the Rosco web site:

www.rosco.com/imagepro/library/

You can examine the images on your computer screen, note the stock number you want and phone it in to Rosco or the Rosco dealer who supplied your projector. The image will be shipped to you, assembled as an iPro Slide and ready for immediate use. Shipment of library-based images is only 24 hours.

2. CREATE IT YOURSELF

If you can create it on a computer, Rosco can make it into an iPro Slide.

The possibilities include full color scenic elements, photos, logos, or any combination. The digital file, 223 dpi 3" x 3", prepared for printing, should be sent to Rosco Laboratories directly or through your dealer. You need to supply directions about whether the image is to be inset as a rectangle within a circle or if the image is to be made into a full-bleed circle. For complete instructions go to:

www.rosco.com/imagepro/library/order.html

The image will be shipped to you, assembled as an iPro Slide and ready for immediate use. Shipment of iPro Slides made from your digital art is almost always within 24 hours of receipt.

3. COPY AND ADAPT

Sometimes you'll see or be supplied with an image from a magazine article or advertisement, a marketing slick or an opaque or transparency photograph. All these sources can be made into an iPro Slide ... but it will take a day or two longer and cost a few dollars more.

Send the material to Rosco Laboratories electronically, via fax or through the US Mail or delivery service. Specify whether the image is to be inset as a rectangle within a circle, or whether the image is to be made into a full bleed circle. Send material to:

Rosco Laboratories, Texas
1600 Chisholm Trail Road #200
Round Rock, TX 78681
Fax: 1-512-388-0196
Phone, toll-free: 1-866-228-2256
customgobo@rosco.com

The image will be shipped to you, assembled as an iPro Slide, ready for immediate use. Raw material, which arrives at Rosco on Day 1, is shipped to you as an iPro Gobo Slide by Day 3. (Material arrives Monday, iPro slide shipped Wednesday.)
